

Test & Evaluation / Science & Technology Program Industry/Academia Days

18 - 20 OCTOBER 2011, ATLANTA GEORGIA
MARRIOTT CENTURY CENTER

At a Glance

What it is:

The purpose of the Test & Evaluation/ Science & Technology (T&E/S&T) Program Industry/Academia Days is to increase awareness of contracting opportunities within the T&E/S&T Program. The goal is to energize talented individuals and their organizations to provide technology solutions to Department of Defense test challenges.

When and Where:

October 18-20, 2011
Marriott Century Center
Atlanta, Georgia

What it will include:

- Overview of the T&E/S&T Program and its nine Test Technology Areas
- Preview of the T&E/S&T Broad Agency Announcement topics
- Contracting and proposal requirements
- Individual meetings with the T&E/S&T Program Manager and Test Technology Area Executing Agents

Who should come:

Researchers and developers in academia, industry, and government

Test & Evaluation/Science & Technology Program

The Office of the Secretary of Defense Test Resource Management Center, which reports directly to the Under Secretary of Defense for Acquisition, Technology and Logistics, will host Industry/Academia Days in support of the T&E/S&T Program.

The T&E/S&T Program is a Research, Development, Test and Evaluation, Budget Activity 3, Advanced Technology program. The program develops test technologies from Technology Readiness Level 3 to Level 6 for transition into test capabilities in time to verify the warfighting performance of the nation's most advanced weapon systems.

The T&E/S&T Program is organized into nine Test Technology Areas in two categories:

- Technologies for T&E of Emerging Warfighting Capabilities:
 - Advanced Propulsion Test Technology
 - Cyber Test Technology
 - Directed Energy Test
 - Electronic Warfare Test
 - Multi-Spectral Test
 - Net-Centric Systems Test
 - Unmanned and Autonomous Systems Test
- Technologies that Support a Broad Spectrum of T&E Capabilities
 - Advanced Instrumentation Systems Technology
 - Spectrum Efficient Technology
